Fixed income risks occur based on the volatility of the bond market environment. Risks impact the market value of the security when it is sold, cash flow from the security while it is held, and additional income made by reinvesting cash flows. ### **Fixed Income Risks - Definition and Overview of Major Risks**

These building blocks are used extensively in fixed-income analysis. The following are the main points made in the reading: The market discount rate is the rate of return required by investors given the risk of the investment in the bond. A bond is priced at a premium above par value when the coupon rate is greater than the market discount rate.
