Problem-solving is, and should be, a very real part of the curriculum. It presupposes that students can take on some of the responsibility for their own learning and can take personal action to solve problems, resolve conflicts, discuss alternatives, and focus on thinking as a vital element of the curriculum.

### **Problem-Solving - TeacherVision**

My thinking is that the point of the lesson is to model equations (problem 1) and identify how to solve addition and subtraction equations (problem 2). The solution, while important, is less of the cognitive load for this lesson. So if a student can answer problems 1 & 2, but somehow misses 3, they can still earn 4 out of 5 points or 80%.
