Below we will discuss two reasons why you should use small engine oil in small air cooled engines. 1. HEAT. Small air cooled engines run hotter than most automotive engines do. This is especially the case on hot summer days. Air cooled engines don't have a thermostat to control the engine temperature like cars do. As the air temperature gets warmer the air blowing over the engine to cool it also gets warmer.

Servicing Air-Cooled Engines. Most small, single-cylinder engines are cooled by a stream of air developed by fan blades on the flywheel. The air stream is deflected around the cylinder and cylinder head by a metal or plastic cover called a shroud. Additional engine heat is dissipated through cooling fins around the cylinder.
