As an engine is basically an air pump which uses fuel to keep moving, the more air you can move, the more power you make. It's a very in-square motor (75\*73 bore\*stroke) so you can make torque and power at the same time. A 5K is basically a 4K with even more potential to shift air because of the larger 80.5mm bore, and it does make a difference.

### 5K Engine by Retro Garage(thailand)

Note: Toyota, in 1987, began assigning dual letter engine codes to some of the "engine family" categories in some engine lines, particularly six cylinder models. This can create potential confusion. E.g. 1MZ-FE - This is not a supercharged, narrow angle, fuel injected M-series engine, but a narrow angle, fuel injected MZ-series engine.
